5) Preparation for the interviews?

- The interview will be conducted via zoom. After registering, CDIA will make an appointment directly.
- The purpose of the interview is to allow us to talk to the students in a **relaxed environment** and **listen** to their interests. We will **accurately grasp their interests, personalities and strengths, and try our best to match students to their preferred fields** based on their information.
- When students attend the interview, they **only** have to tell us **when they will be available for their work experiences, so that we can prepare a schedule in advance.**
