

S&R 招募過程引發的問題 (Standard Q& A)

3) 暑假期間補課/活動時間與工作體驗時間相撞會怎樣安排？

- 我們希望家長和同學能全面了解這項工作體驗計劃的宗旨。
- 這個計劃並不是要為同學安排職業（或俗稱「搵工」）。因為同學們尚在求學，無需在這個階段找工作。但我們有必要讓他們及早認識職場，接觸社會，擴闊視野眼，認識自己心儀興趣行業的性質和將來發展，定好職志方向，為自己將來作好準備。
- 要知道現在世界經濟發展一日千里，不少工種和崗位未來可能會消失；而將來的新工種，現在還未出現。所以倘若我們將工作體驗計劃的焦點放在幫同學找工作的話，是會有點不切實際，亦未必能夠讓同學的興趣潛能得到最大的發揮。
- 但我們會配合同學的興趣安排他們到心儀的職場或崗位，目的是要讓他們及早知道自己興趣行業的性質，發展和入行要求，然後配合自己興趣選科，及早把穩職志方向。這些職場機會同學自己難以找到，是非常難得的。希望同學好好把握。

S&R Inquiry about the Application Process (Standard Q&A)

3) What if tutorials/activity time collides with the work experience time during the summer vacation?

- We hope that parents and students will have a comprehensive understanding of the purpose of the Work Experience Program.
- This scheme is not intended to provide students with a job. Because students are still studying, it is not necessary to find jobs at the moment. However, **it is necessary for them to get familiar with their workplace as early as possible, get in touch with the society, broaden their horizons, and know their own preferences, the nature and future development of the industry they are interested in, set the direction of their career, and prepare themselves for the future.**
- **You must know that the world economy is developing rapidly, many job opportunities may disappear in the future; and we do not know what new job opportunities will appear in the future.** Therefore it would be somewhat unrealistic if we focus on helping students find jobs in the work experience program. Realistically, it may not be able to maximise students' interest potential.
- However, we will arrange students to work or positions of their choice according to their interests, so that they can discover what they are interested in as soon as possible. **The ultimate goal is to let students learn about the nature of the industry, development and entry requirements, then choose subjects according to their own interests, and stabilise the direction of their career as soon as possible.** These opportunities are difficult to come across, so we hope students can utilise them well and maximise their potential.
